

AUDIX®

NOVACORE

Novacore Wireless

- Novacore is AUDIX's new digital wireless platform
- Trusted AUDIX sound from a secure, scalable system designed for demanding live applications. Novacore serves as the foundation for all AUDIX digital wireless, supporting handhelds, bodypacks, capsules, receivers, and wireless MicroBooms across live sound, worship, legislative, education, and similar professional applications

Novacore

Unique Audix Sound, now Digital

- World class radio technology
 - High channel count (30-40 simultaneous under typical conditions)
 - Image and spurious rejection on par with elite brands
- Dante included on 2 and 4 channel receivers
- Secure AES-256 Encryption
 - Suitable for judicial and legislative applications
- Remote control and monitoring
 - Software for channel coordination, system control and monitoring
- TAA Compliant

Novacore

Unique Audix Sound, now Digital

- Accessories to complete every system
 - Rechargeable battery system and charging stations (single and dual)
 - Antenna combiner with power distribution
 - Remote antennas
 - Bodypacks compatible with Audix headset and lapel mics

NCR1

Digital Receiver

AUDIX®

- Durable, metal construction
- Clear metering of all critical functions
- Scan / sync for optimized frequency selection
- Rear connection for Frequency Coordination software
 - Easy daisy chain connection for multiple units
- XLR Out with variable level switch

AUDIX®

NCBP

Digital Bodypack Transmitter

- Durable ABS construction – compact and light weight
- 3 Pin connectivity for compatibility with Audix lapel and headset mics
- Excellent performance for guitar applications
- 2x AA batteries or 1x 18500mah rechargeable
 - Recharge 18500mah through USB or charging station
- Remote hard-wire mute for referee or other applications

NCHH

Digital Handheld Transmitter

- Durable, metal construction
- Intuitive menu structure with features designed to enhance performance
- Expanded mute mode options
- AA batteries or 18500mah rechargeable
 - Recharge 18500mah through USB or charging station
- Available with or without NC Capsule

Novacore Dynamic Wireless Capsules

- “S” thread to match with handheld transmitters from Audix and other popular brands
- Highly innovative suspension design for touch noise mitigation, vibration dampening and shock absorption
- A proven, long-life capsule design that will not degrade over time

AUDIX®

Novacore Capsules NC-EC Extended Cardioid

- Outstanding vocal clarity and uniform frequency response
- Natural and balanced, providing both the engineer and the artist with predictable and reliable audio performance
- A consistent sonic signature regardless of working distance
- Maintains famous VLM transient response and off-axis rejection that Audix is known for

AUDIX®

Novacore Capsules

NC-TH Tight Hypercardioid

- Specifically engineered for close mic use on loud stages
- Excellent vocal isolation and clarity
- Extreme rejection of sound from the rear and off-axis
 - Provides the cleanest in-ear monitor (IEM) mixes imaginable and impressive gain before feedback with stage monitors
- Maximum SPL capability of 144dB - ample headroom for even the most powerful vocalists

Timeline
